# Closet Design Survey

Complete a quick inventory of your closet. This will help your Distinctive Storage Solutions' professional designer create a functional solution that maximizes your space.

- Create an inventory for each person who uses the closet
- Remember to account for new items to be stored, in addition to your existing items.
- Evaluate and note your likes/dislikes for your current storage method for accessory items such as purses, hats, jewelry, etc.
- Note items that need special consideration such as luggage, tall boots, high heeled shoes, etc.
- Measure the height of hanging items from the top of the closet rod to the bottom of the item.
- Measure the widest width for folded storage.
