WOOD SPECIES

Maple

Maple is widely used in the cabinetry industry. This wood species features a straight grain with several distinctive characteristics. These include unique figures such as bird's-eye, fiddle back, mineral streaks and curly grain patterns. Finely textured with a natural luster, this creamy-white to light reddish-brown wood is often used for cabinets and floors.

Oak

Authentic American red oaks are open-pored and have grain patterns. Wellborn's manufacturing technology presents oak with straighter grains than most cabinet lines, and our process minimizes the wide grains and reduces the widths of cathedrals in oak.

MDF

Using high pressure and temperatures, MDF is formed by combining wood fibers with a wax resin binder to form panels. It is made of wood veneer. It is much more dense than normal particle board. This is a durable and tough wood product, commonly used in the construction industry.

Laminate

Laminate is a decorative panel with resin-saturated printed paper thermally fused to a particleboard or MDF core. The thermally fused melamine process bonds the paper and board using heat and pressure. The paper gives the appearance of wood grain or painted finishes.

Thermofoil

Thermofoil doors and drawer fronts are covered in a strong, scratch-resistant thermofoil that is thermally glued and vacuum-sealed. To create the popular raised panel appearance we use precision, diamond-head routers to carve the double-step perimeter edge and center panel detailing from a solid slab of medium density fiberboard.

Cabinet Construction

STANDARD

1. Face Frames: $\frac{3}{4}$ " x $1\frac{3}{4}$ " solid wood face frame, assembled using mortise and tenon construction.
2. Adjustable Shelves: $\frac{3}{4}$ " furniture board with wood grain lamination on two sides, banding on edges and dual locking WellLock® Shelf Clips.
3. Drawer Boxes: $\frac{3}{4}$ " furniture board drawer sides with wood grain lamination to match cabinet interior, tenoned to accept $\frac{1}{2}$ " sub-front and back. $\frac{1}{8}$ " Hardboard drawer bottom with wood grain/white lamination.
4. Drawer Fronts: Drawer front has adjustability.
5. Drawer Slides: 75-pound rated epoxy coated, double captive guide system, side mounted, adjustable, self-closing with mounting brackets at rear.

Standard Drawer

$\frac{3}{4}$ " Laminated furniture board drawer sides with epoxy coated self-closing, side-mount drawer slides.

6. End Panels: $\frac{1}{2}$ " furniture board with wood grain laminated end panels and banded on top and bottom edges of wall cabinets to complement door.
7. Cabinet Tops & Bottoms: $\frac{1}{2}$ " furniture board with wood grain lamination/solid wood brace on 36" wide and larger cabinets.
8. Backs: $\frac{1}{8}$ " wood grain laminated MDF with fiber board hanging rails.
9. Toe Kicks: $\frac{1}{2}$ " unfinished furniture board full height captive toe kick.
10. Interiors: natural maple wood grain/white laminate.
11. I-Beam: $\frac{1}{2}$ " x 3" I-Beam furniture board support dadoed into front, back and side.

Plywood Drawer Upgrade Option

$\frac{3}{4}$ " Plywood drawer with dovetail joints and undermount drawer slides.

NOTE: For Thermofoil door styles, the cabinet interior and exterior are white laminate, the face frames are white finished maple and the drawer front is $\frac{3}{4}$ " thermofoil laminated furniture board.

For Laminate door styles in White and Linen, the cabinet interior is matching white laminate and the exterior is matching white or linen laminate, the face frames are matching finished maple and the drawer front is $\frac{3}{4}$ " melamine laminated front.

ALL PLYWOOD CABINET (APC) OPTION

1. Face Frames: $\frac{3}{4}$ " thick, $1\frac{3}{4}$ " frame, solid wood assembled using mortise and tenon construction.
2. Adjustable Shelves: $\frac{3}{4}$ " plywood with wood grain lamination on two sides, banding on edges and dual locking WellLock® Shelf Clips.
3. Drawer Boxes: $\frac{3}{4}$ " plywood dovetail drawer sides in a natural finish.
4. Drawer Fronts: $\frac{3}{4}$ " solid wood drawer front.
5. Drawer Slides: 75-pound rated epoxy coated, undermount.

Standard Drawer

$\frac{3}{4}$ " Plywood drawer with dovetail joints and undermount drawer slides. Dovetail joints are unfinished.

6. End Panels: $\frac{1}{2}$ " unfinished plywood end panels. Matching Finished End Option available.
7. Cabinet Tops & Bottoms: $\frac{1}{2}$ " thick plywood with wood grain lamination/solid wood brace on 36" wide and larger cabinets.
8. Backs: $\frac{3}{16}$ " wood grain laminated plywood with plywood hanging rails.
9. Toe Kicks: $\frac{1}{2}$ " unfinished plywood extends to cabinet floor for captive construction.
10. Interiors: plywood with natural maple wood grain laminate.
11. I-Beam: $\frac{1}{2}$ " x 3" I-Beam plywood support dadoed into front, back and side.

The Fairfax door style has limited availability of cabinets and options. Not all cabinets shown on pages 14-15 are available.

The Wellborn Quality in Home Concepts

Since 1961, Wellborn Cabinet, Inc. has been manufacturing quality kitchen and bath cabinetry in Ashland, Alabama. It all began in a small cabinet shop to build cabinets for the local markets. Since that time, Wellborn has become a state of the art manufacturing facility of over 1.8 million square feet that combines some of the most advanced technology systems in the industry with over 50 years of acquired knowledge and experience in high quality cabinetry craftsmanship.

Green Choice is About Taking Action

Environmental stewardship has been part of Wellborn's culture since its beginning. This responsibility has never been just about words. It has been about decades of actions, investments and practices. At Wellborn we have recycling programs, utilize wood waste to generate power and steam and continue to lower VOC emissions through technology. We also partner with our suppliers to improve their environmental programs. This is why you will find the KCMA Environmental Stewardship Program seal on our cabinetry.

The Green Choice program ensures that you are purchasing a brand of cabinets from a company that takes conscious steps to protect and minimize the overall impact on our environment.

Due to the natural variation and aging process, minor differences may be noticed in color match when replacing doors on existing cabinetry or adding additional cabinetry at a later date. It is a characteristic of stained wood finishes, thermofoil and laminate cabinetry to age over time when exposed to smoke, sunlight or general household detergents and chemicals. Therefore, we recommend using only a soft, clean cloth or furniture polish containing natural oils and cleaning emulsifiers to clean the finish of your Home Concepts wood cabinets. Products containing wax or silicone polishes are NOT recommended. In order to maintain the maximum quality and beauty of your thermofoil and laminate cabinetry, avoid exposure to moisture to the back edge of the doors. Undue wetness could result in delamination over time.

Due to the natural characteristics of wood and the limitations of photography and the lithographic printing process, the woods and wood finishes shown in this brochure may not accurately depict those offered by Home Concepts. See your local Home Concepts dealer for actual wood sample color selections and for complete warranty details. The Home Concepts Series has a machine sanded finishing process and does not include the detailed hand sanding technique featured in the Wellborn Collection. Therefore, Wellborn Cabinet, Inc. does not recommend designs combining these series. Combining the Home Concepts with the Select Series and Premier Series in the same design will void the cabinet warranty.
